

Roulette Strategy Cheat Sheet

Roulette betting system · Kim Birch · RouletteSheet.com

Cheat Sheet Summary

System type	Mixed (negative, positive, coverage, sector)
Best suited table	European or French (single-zero) preferred
Usual bet type	Even-money bets, dozens, sectors
Risk level	Varies by system
Changes house edge?	No.

How it works

A roulette strategy changes how you size or place bets, not the underlying odds. No system removes the house edge of 2.70% (European) or 5.26% (American).

Example progression on 1-unit base

Spin	Bet	Result	Cumulative P/L
1	1	Loss	-1
2	2	Loss	-3
3	3	Win	0
4	1	Win	+1

Where the risk appears

Every system on this sheet is constrained by table limits, bankroll and variance. Build a stop-loss and a target before each session.
